Taranis Resources Inc. Commences Drilling in Finland

Lakewood, Colorado, March 22, 2010 – Taranis Resources Inc. ("Taranis") [TSX.V: TRO] is pleased to announce that it has initiated the spring drilling program in Finland.

Drill pads have been completed on the Naakenavaara copper-gold project in preparation for winter drilling, the road to the Kettukuusikko Project has been opened and a site for the completion of a single drill hole on the Kettukuusikko South Zone ("KSZ") has been prepared. Despite having drilled 166 holes in the Kettukuusikko Project (12,945 m), no drill holes have explored the footwall of the existing deposit where Taranis has uncovered some evidence of folding near the base of the KSZ. Taranis feels it is important to gain further understanding of this area in order to enlarge the size of the existing gold deposit. Also, the core will be used for some preliminary metallurgical work in order to understand the nature of the gold mineralization and its beneficiation.

Drilling will commence on the Naakenavaara Project immediately after the hole is completed at Kettukuusikko. Taranis plans to test a number of strong geophysical targets east of a 2.5 by 1.5 km area of copper-gold mineralization. These targets are related to a large "ladle-shaped" ultramafic intrusive body that bears many similarities to the Outokumpu Mine located in central Finland.

Congratulations to Alia Bigio of Underworld Resources who was the winner of the Sony high definition camera at this year's business card drawing at the Prospector's and Developer's Convention in Toronto!

About Taranis Resources Inc.

Taranis currently has 21,623,260 shares issued and outstanding (28,030,600 shares on a fully-diluted basis).
